

Victória Gomes

PhD Student & Software Engineer | Backend, Full-Stack & Distributed Systems

Richmond, VA, USA | victoria.oliveiragomes@gmail.com

linkedin.com/in/victoriaogomes | victoriagomes.dev

SUMMARY

PhD student in Computer Science with 4+ years of fintech software engineering experience, including Technical Lead responsibility for a seven-engineer Open Finance squad. Promoted three times at Banco PAN while building backend and full-stack systems with Java, Python, Spring Boot, Angular, AWS, microservices, and event-driven architectures. Current research explores researcher-in-the-loop LLM and AI agent workflows. Seeking a hands-on software engineering internship during my PhD, focused on backend or full-stack product development.

EDUCATION

Virginia Commonwealth University, Richmond, VA, USA	Expected Aug 2028
<i>PhD in Computer Science</i>	<i>GPA 4.0/4.0</i>

Universidade Estadual de Feira de Santana, Feira de Santana, Bahia, Brazil	Sep 2022
<i>B.S. in Computer Engineering</i>	<i>GPA 8.9/10</i>

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, TypeScript, Dart, Kotlin
- **Backend & Web:** Spring Boot, Quarkus, Quart, Angular, Flutter, REST APIs
- **Cloud & DevOps:** AWS, Kubernetes, CI/CD, Git, Gitflow, LocalStack
- **Testing & Quality:** JUnit, Jest, Selenium, SonarQube, unit testing, integration testing, end-to-end testing
- **Observability:** Dynatrace, Elasticsearch, Amazon CloudWatch, log analysis, request tracing
- **Architecture & Data:** Microservices, distributed systems, event-driven systems, MongoDB, MySQL

PROFESSIONAL EXPERIENCE

Banco PAN	São Paulo, Brazil
<i>Technical Lead</i>	Jan 2025 – Jul 2025

- Led a cross-functional Open Finance squad of **seven engineers**, owning architecture and delivery across **30+ microservices** and coordinating dependencies with **five teams** to meet regulatory deadlines
- Translated business requirements and system designs into implementation plans through backlog refinement and architecture reviews; communicated technical decisions, risks, dependencies, and release readiness to management and partner teams
- Reinforced code review, CI/CD, testing, and SonarQube quality standards across Java, Python, and Angular codebases, sustaining **90%+** unit test coverage
- Remained hands-on with Java, Spring Boot, Quarkus, Python, and Angular, including JUnit/LocalStack integration tests and Selenium end-to-end tests

<i>Mid-Level Full-Stack Software Engineer</i>	Aug 2023 – Dec 2024
---	---------------------

- Developed APIs, event-driven services, shared libraries, and frontend features across an ecosystem of **30+ services and applications** using Java, Spring Boot, AWS, Dart, and Flutter
- Built JUnit/LocalStack integration tests and Selenium end-to-end tests and instrumented services with Dynatrace, Elasticsearch, and Amazon CloudWatch
- Built an Azure DevOps-integrated branch governance tool that enforced Gitflow policies and identified **200+ obsolete branches** and **50+ branches lacking backup coverage**
- Implemented an event-driven customer data retrieval service that processed **1M+ messages** per daily run

<i>Junior Full-Stack Software Engineer</i>	Feb 2022 - Jul 2023
--	---------------------

- Automated weekly report generation using Python and Quart, reducing processing time **from five business days to 30 seconds**
- Migrated a web application from AWS Elastic Beanstalk to Amazon S3 static hosting, reducing annual infrastructure and maintenance costs by **more than 90%**

<i>Software Engineer Intern</i>	Aug 2021 - Jan 2022
---------------------------------	---------------------

- Selected as **one of 29 participants from 5,000+ applicants** for Banco PAN's software engineering program
- Built an internal code-review assistant for Java, Python, and JavaScript repositories, increasing pre-merge bug detection by **20% across two development teams**

AWARDS AND RECOGNITION

- **Banco PAN Merit Award for Outstanding Performance** — 2023 and 2024: two-time recipient recognized for teamwork, innovation, dedication, ownership, and initiative

RESEARCH EXPERIENCE

Virginia Commonwealth University Richmond, VA, USA
Graduate Researcher – Advisor: Dr. Rodrigo Spínola Aug 2025 – Present

- Investigating how LLMs and AI agents can support empirical software engineering research through researcher-in-the-loop workflows, augmenting research activities while preserving researcher oversight and final decision-making authority
- Architect and implement an AI-assisted physical therapy platform for post-stroke patients with VCU Health clinicians, owning backend and frontend architecture, data workflows, and project coordination

Universidade Estadual de Feira de Santana Feira de Santana, Bahia, Brazil
Undergraduate Researcher – Advisor: Dr. Victor Travassos Sarinho Aug 2017 – Sep 2021

- Developed educational games for histology instruction and for individuals with autism spectrum disorder; secured competitive funding from CNPq, FAPESB, and UEFS.

CERTIFICATIONS AND LANGUAGES

- **Certification:** AWS Certified Cloud Practitioner Expires: Sep 2029
- **Languages:** Portuguese (native), English (fluent)

VOLUNTEER EXPERIENCE

Google Product Experts — Diamond Product Expert Jun 2023 - Present

- Earned **Diamond Product Expert** status, the program's highest level, after resolving **600+ Google Drive inquiries** and providing technical guidance to users worldwide
